

Integrated and Complementary Software to Get the Insight Out

Ascribe Intelligence is a flexible suite of connected verbatim comment analysis tools that empower companies to classify, code, analyze and visualize customer comments affordably.

Automated	Innovative
Scalable	Proven
Adaptable	Precise
Integrated	Versatile
Affordable	Powerful
Fast	Multi-technology
Supported	Multi-lingual

Industry-Leading Training, Support and Innovation

Ascribe Intelligence works seamlessly with your platforms and people, with user friendly functionality and technologies that enable you to generate actionable insights. But our tools also come with the support of our industry leading team of training, service, development, coding and classification professionals. We set the standard, and constantly raise the bar.

ASCRIBE INSPECTOR

Ascribe Inspector automatically categorizes any textual data quickly using rules-based Natural Language Processing (NLP) to generate actionable insights.

ASCRIBE ILLUSTRATOR

Ascribe Illustrator transforms multiple sources of data into an array of images, from simple charts to detailed reports, as well as comprehensive dashboards.

ASCRIBE CODER

Ascribe Coder delivers a web-based, semi-automated coding management system that is flexible, powerful and universal.

ASCRIBE ACCELERATOR

Ascribe Accelerator employs a powerful combination of non-rules based NLP and machine learning to precisely code tens of thousands of open-ended comments per hour.

Ascribe Intelligence is comprised of a powerful combination of technologies that can universally import and export data across virtually any platform, source and language. Available individually or integrated, the software suite addresses a variety of needs, from traditional market research analysis to quick interpretation of consumer comments, generating **customized results and actionable insights** accurately and efficiently.
